BREWER'S REGISTERED SAFETY WINDOW.—Registered 3rd February, 1851. No. cccxcii. Vict. c. 65.—The attention of Architects, Builders, and others interested in the erection and improvement of Dwellings, is especially called to this invention, which for simplicity, economy, safety, and convenience, is unrivalled. By the invention sash weights, cords, and other incumbrances attending the window in present use are dispensed with; solidity given to the frame-work; and from 25 to 50 per cent. saved in the cost. Ventilation can be given to any extent by means of the upper sash, thereby directing the current of air along the ceiling, by which PERFECT ventilation is secured without incurring danger from draughts. The whole of the WINDOW OPENS INWARDS, because the sash of necessary, thus affording an immediate and easy means of removal of furniture, or escape in case of fire. By this method also, the dangerous and indecent practice which exists of female servants standing outside windows for the purpose of cleaning them, is avoided. In THE WHOLE OF THE WINDOW WILL BE CLEANED INSIDE THE ROOM. Dust and dirt is also effectually excluded. The invention is applicable to either iron or wood.—Licenses to work the invention: One Guinea each, and Registered Tickets, for placing on each window, One Shilling each, may be procured of F. J. BREWER, 8, Islington, Five Ways, Birmingham, where a model may be seen. On receipt of a postage stamp, drawings will be sent to any address.
